

INVITATION TO EXHIBIT

International Symposium on 3D Power Electronics Integration and Manufacturing June 13-15, 2016 McKimmon Center, Raleigh, NC, USA

Dear Colleague,

I want to personally invite you to attend a conference that promises to be different. 3D-PEIM is focused on the three dimensional design requirements of integrated power electronics. But more than just design, we will also discuss manufacturing processes. And more than just presentations, we will also have tutorials and dialogue sessions designed for detailed questions and answers. This is one of those rare conferences where you will engage with participants and presenters and suppliers to deeply understand power electronics packaging. Register at <http://www.3d-peim.org/registration>.

This conference also presents a great opportunity for Exhibitors and Sponsors to reach a very specific market at a very reasonable price. In keeping with the spirit of this event, we're only using table top displays. Bring your marketing materials, hands on demos and product samples but leave the booth at the office! You can find more information at <http://www.3d-peim.org/sponsors>.

This is an exciting time in our industry and this conference promises to provide many exciting ideas and possibilities. See you in Raleigh on June 13-15 2015.
