 3 Mio. Euro

Employees:  
 25 people

Budatec GmbH is a leading machine manufacturer for the semiconductor and solar industry based in Berlin. The main business areas are thermal systems and products for manufacturing electronics.

The core competence are vacuum soldering systems. In this field we own over 20 years of experience. Our vacuum soldering systems are developed, designed and manufactured in Berlin and are distributed worldwide. Beside this we own expertise with solder free sintering systems with hard and soft tools. Budatec GmbH is one of the technological market leaders, especially in the use of hydrogen and plasma gases in our systems.

- **Vacuum soldering systems: small, medium and large batch machines to fully automated production systems**
- **Sintering systems: small devices (integrateable into our vacuum soldering systems) and large production systems**

Bodenplatte      Bodenplatte mit DCB      Bodenplatte mit DCB und Chips

All in one sintering for copper surfaces

- **Special developed tools or machines for costumers**
- **Technology consulting for vacuum solder und sinter connections**
- **Costumers for our machines**
- **Strategic partners of the same technology**
- **Cooperation partners for research projects**
